PROFILE SUMMARY

Generative AI Architect, Software Architect, and Enterprise Architect with over 15 years of experience leading technological modernization, solution architecture, and defining enterprise capabilities in retail, banking, insurance, telecommunications, and manufacturing. Specialized in AI platform strategy, LLMs integration, RAG, agentic architectures, AI governance, cloud/hybrid architecture, and enabling shared capabilities at scale. I combine strategic vision, technical leadership, and hands-on execution to transform technological initiatives into sustainable business capabilities.

COVER LETTER

Dear Hiring Manager

I am thrilled to apply for the Generative AI Architect position at NTT Data, which I discovered through your company's career page.

I am confident that my eagerness to learn and my recent experience leading architecture initiatives for generative AI at Falabella make me a great fit for this role. My expertise in AI platform strategy and integration with LLMs aligns perfectly with the responsibilities of designing end-to-end AI solution architectures and ensuring their scalability and security.

I am excited by NTT Data's commitment to innovation and its role as a leader in technology. I share these values and am eager to contribute to the company's success by bringing my energy and strategic vision to the team.

I am enthusiastic about the opportunity to discuss how my skills and experience align with the needs of NTT Data. I am available for an interview at your earliest convenience.

Best regards,

Guillmar Ortiz
